Weekly status:

This week was continuing and finishing up individual tasks. The git repository was set up, and each member was tasked with installing and connecting to the git repository. The website mockup has been shown to the group and it is being further structured for the group to use. The development computer for the GNU radio has been set up, and it is a task this week to network that with the radios that the LAN on which it will operate. Further looking into machine learning, one of the group members has started following along with a Stanford course on understanding machine learning.
